Application No.

Applicant(s)

1/2

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Claim 1 was discussed regarding the broadness of the claim. One issue regarding claim 1 that was discussed was the harmonic component in claim 1 not containing random components of the speech signal. Claim 13 was also discussed regarding the scaling parameters. The scaling paramters for the noise and harmonic components are different, the attorney had argued that the Gao reference does nto apply two different gains on the signal but rather 1 depending on noise or speech present. Based on these findings, an additional search would be needed based on advancement of the application since an Advisroy Action was mailed out..
